

Alex Morgan

Senior Backend Engineer | Python · Cloud · Data

Remote · alex@example.com · [LinkedIn](#)

PROFILE

Software engineer experienced in building backend services, APIs, and data platforms. Comfortable working across architecture, delivery, and production operations with distributed teams.

TECHNICAL SKILLS

Languages	Python, JavaScript, SQL, Bash
Backend	FastAPI, Django, REST APIs, background workers
Architecture	API design, distributed systems, event-driven services
Data	PostgreSQL, MongoDB, Redis, search and indexing
Cloud & DevOps	AWS, Docker, CI/CD, Git
Collaboration	Technical planning, mentoring, stakeholder communication

PROFESSIONAL EXPERIENCE

Senior Backend Engineer | Example Media Group — Remote

2022 – Present · **Technology:** Python, FastAPI, PostgreSQL, Docker, AWS

- Built backend services for a multilingual content platform used by partner organizations.
- Designed reliable ingestion and indexing workflows for articles and media metadata.
- Improved API performance, monitoring, and operational tooling.
- Worked with product and editorial teams to plan and deliver new platform capabilities.

Backend Engineer | Example Consulting — Remote

2019 – 2022 · **Technology:** Python, Django, PostgreSQL, Redis, Docker

- Designed and implemented APIs and data-processing services for customer projects.
- Improved background processing and error recovery for long-running jobs.
- Helped teams define service boundaries and deployment workflows.

Software Engineer | Example Product Studio — Hybrid

2016 – 2019 · **Technology:** Python, JavaScript, PostgreSQL, Linux

- Developed features for a subscription software product and its integration APIs.
- Added reporting tools that helped customers understand their activity.
- Collaborated with designers and support staff to resolve user issues.

PREVIOUS EXPERIENCE

Software Developer | Example Systems — Onsite

2013 – 2016 · **Technology:** Python, Java, SQL, Git

- Built internal applications and automation for business teams.
- Maintained services and documented operational procedures.

Junior Developer | Example Labs — Onsite

2011 – 2013 · **Technology:** Python, JavaScript, SQL

- Implemented application features and fixed reported defects.
- Wrote scripts to simplify routine development tasks.

SELECTED PROJECTS

- [Example News Platform](#) — A sample service for collecting and browsing public-interest news.
- [Project Atlas](#) — A sample search and discovery application.

EDUCATION

BSc in Computer Science — Example University · Graduated 2011
